

## THE COUNTDOWN HAS BEGUN.....

In less than one month, the LCME survey team will be here! Our preparations for this have been ongoing for three years, so we are excited that the time has come. All participants have been notified and we thank you for your excitement and support. As we continue to prepare, calendar invites have been sent for both the survey visit and prep sessions to be held with all participants, both those who were involved in the mock site visit, and those newly identified. Please be on the lookout for additional information regarding the visit as we continue our countdown.

## THANK YOU!!

Last month we conducted our Mock Site Visit, where two consultants came in and met with faculty, residents, staff, and students. The intent was to mirror the actual site visit and provide real time feedback in preparation for April. Thank you to everyone who participated and provided support.

### PSOM LCME ACCREDITATION SITE VISIT - APRIL 14-17, 2024

## IMPORTANT REMINDERS FOR PARTICIPANTS:

- Please attend your prep meeting to learn more of what to expect during your session
- Remember to wear your University issued ID (Penn Card) at all times during the visit

Pre-brief Room  
Conference Room 3  
PCAM 5<sup>th</sup> Floor  
Exec Suite

LCME Meeting  
Mueller Board Room  
PCAM 4<sup>th</sup> Floor

Post-Brief  
Conference Room B  
PCAM 4<sup>th</sup> Floor

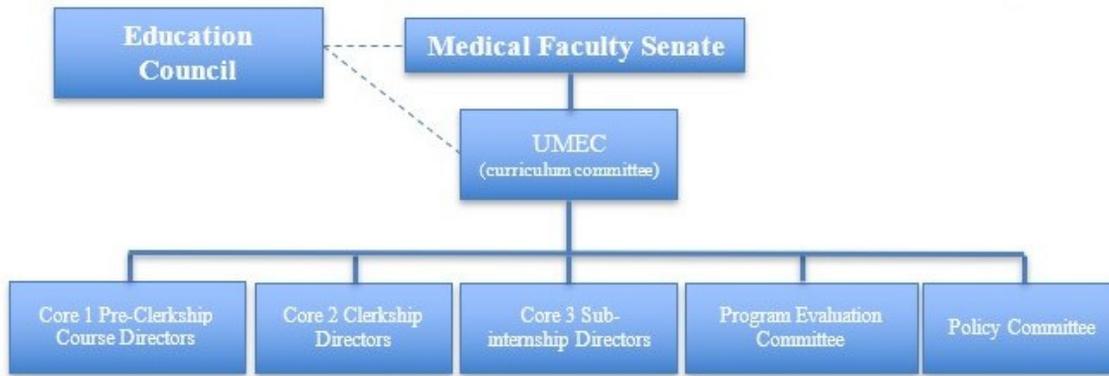

## DID YOU KNOW.....

### PSOM GOVERNANCE

Did you know that the **Medical Faculty Senate (MFS)** is the Central Governance body for Education in PSOM? MFS has delegated curricular policy development and approval to the **Undergraduate Medical Education Committee (UMEC)** if applied to the MFS-approved curriculum; for anything that affects multiple programs in the school (e.g. UME and BGS) or affects the culture of the school, MFS has direct oversight.

Education Council oversees the strategic direction for the Perelman School of Medicine across programs and makes sure that policies and programs across schools are supportive, synergistic, where possible, and that finances for education are developed across the board.

#### Organizational Structure for Curriculum Governance

### MEDICAL EDUCATION PROGRAM OBJECTIVES (MEPOS)

Did you know that our curriculum is designed to help students gain the knowledge and skills essential for creating and delivering the exceptional patient-centered medicine of tomorrow? It is underpinned by four foundational pillars that constitute our medical education program objectives (MEPOS) which can be found [here](#).
